

ThetaHealing® Intuitive Anatomy

Immerse yourself in the human body and deepen your understanding of the interaction between thoughts, emotions and physical symptoms.

A magical journey through the realm of the body systems,
that bring more depth and clarity to your work.

We can only love that which we know. In this class,
you get to know yourself on intimate level and love yourself more

Seminar description

Most people say, “there is a life before and a life after Intuitive Anatomy”.

We enter into a special cocoon, that allows us to explore ourselves, our body and health.

We immerse ourselves deeper and deeper in ourselves to come out at the other end like a butterfly, flying into the light in joyful selflove and self-knowledge.

Did you know that our skin is directly connected with how well we can set boundaries? That our liver holds on to anger? That our lungs and respiratory system are intimately connected with how we allow ourselves to feel grief?

The Intuitive Anatomy Seminar is an intuitive journey of discovery through the body, that profoundly familiarizes the practitioner with the organs and body systems. Resolving the limiting programs of the different body systems and releasing emotional energies from them helps you to become lighter and witness integral healings. You train witnessing the desired changes inside the physical body and with the daily work in form of intuitive readings, body scans and belief work on yourself and others, your intuitive skills unfold noticeably. At the same time, your trust in the Creator is enhanced and the method is so firmly integrated that it becomes a natural part of your daily life.

Of course, it is also a wonderful opportunity to work on existing health issues and witness powerful healings in your own body.

Together we journey through:

Day 1: Microbes and Parasites

Day 2: The Skeletal System

Day 3: The Endocrine System

Day 4: The Digestive System

Day 5: The Respiratory System

Day 6: The Heart and Circulatory System

Day 7: The Lymph System

Day 8: The Excretory and Sexual System

Day 9: The Muscles

Day 10: The Nervous System

Day 11: The Skin

Day 12: The Eyes
Day 13: The Brain
Day 14: The Ears
Day 15: The Body as a Whole

Often times, the friendships that are formed during this seminar are lifelong.
